

USAMA SHOUKAT

Data Analyst | Machine Learning Engineer

+92 323 8036749 | usamashoukat941@gmail.com | Super Town Walton Road, Lahore Cantt | linkedin.com/in/usama-shoukat

Professional Summary

I am motivated and detail-oriented Data Science and AI enthusiast with strong analytical skills and a passion for transforming complex data into actionable insights. Proficient in statistics, data analysis, machine learning, and data visualization, with hands-on experience in real-world projects including cancer detection, fraud prediction, and object detection using YOLO. Eager to contribute to data-driven decision-making and continuously expand knowledge in the rapidly evolving field of Artificial Intelligence and Data Science.

Technical Skills

Programming Language	Python
Libraries & Frameworks	TensorFlow, Keras, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, PyTorch
Machine Learning	Classification, Regression, Predictive Modeling, Decision Trees, Random Forests, SVM, Feature Engineering
Deep Learning	Neural Networks, CNN, YOLO
Data Analysis	Data Cleaning, Data Wrangling, EDA, Data Visualization, Statistical Analysis
Data Scraping	BeautifulSoup, Selenium
Databases	MySQLite3
Deployment & Tools	Flask, Streamlit

Projects and Work Experience

Appendix Cancer Detection — Final Year Project (FYP)

Academic Research Project | KFUEIT, Rahim Yar Khan

- Developed a machine learning model to detect appendix cancer using classification techniques including Random Forest, SVM, and Logistic Regression.
- Cleaned and pre-processed medical datasets; performed exploratory data analysis (EDA) to ensure accurate and high quality model inputs.
- Evaluated model performance using precision, recall, F1-score, and ROC-AUC to optimize diagnostic accuracy.

Credit Card Fraud Detection

Machine Learning Project

- Built an end-to-end fraud detection pipeline using Logistic Regression and Random Forest classifiers on imbalanced financial transaction data.
- Applied feature engineering and class-imbalance handling techniques to improve precision and reduce false positives.
- Achieved high accuracy in identifying fraudulent transactions across test datasets.

Object Detection using YOLO

Deep Learning / Computer Vision Project

- Implemented YOLO for real-time object detection on custom image datasets using Python and OpenCV.
 - Performed dataset annotation, model fine-tuning, and evaluated detection performance using mean Average Precision (map).
-

NAVTTTC AI/ML Training Program

Built-in-Soft Software House, Lahore | 2025 (Government Certified)

- Completed nationally certified AI/ML training covering supervised learning, deep learning, and model deployment with Python and TensorFlow.
 - Delivered hands-on projects applying Scikit-learn, Keras, and data visualization libraries.
-

Full Stack AI Training

NexSkills Institute, Lahore | 2026

- Currently completed a Full Stack AI program covering LLMs, REST API development, Flask/Streamlit deployment, and cloud integration.

JOB EXPERIENCE

6 months of Job experience as a Customer Support Representative at Citizen Contact Center a Project by Punjab Information Technology Board.

EDUCATION

BS in Data Science (DASC)

– 2026

Khawaja Fareed University of Engineering & IT (KFUEIT), Rahim Yar Khan | Grade / CGPA: CGPA: 3.44 / 4.00

F.Sc — ICS (Intermediate)

– 2021

Board of Intermediate & Secondary Education (BISE), Bahawalpur | Grade / CGPA: 65%

Matriculation — Science

– 2019

Board of Intermediate & Secondary Education (BISE), Bahawalpur | Grade / CGPA: 93%

CERTIFICATIONS

- NAVTTTC Certified — Artificial Intelligence & Machine Learning | Built-in-Soft Software House, Lahore (2025)
- Microsoft Certified — Azure AI Fundamentals
- Uniathena Certified — Basics of Python and Data Science
- NexSkills Institute — Full Stack AI Certification

Soft Skills

- Team Collaboration & Cross-functional Communication
- Problem Solving & Critical Thinking
- Project Management & Time Management
- Client Communication & Adaptability
- Continuous Learning & Growth Mindset
